GLOBALINK RESEARCH INTERNSHIP AWARD DISBURSEMENT INFORMATION AND PLACEMENT TERMS AND CONDITIONS

Dear PRATIKSINGH THAKUR,

Congratulations! You have been selected by Mitacs and Professor RITA ORJI from Dalhousie University – Halifax to receive a 2022 Globalink Research Internship award. You are therefore invited to participate in a research project at **Dalhousie University** – **Halifax**. **Pursuant to an agreement with Dalhousie University** – **Halifax**, **Mitacs will administer your funding grant.**

Mitacs Globalink Research Internship is a competitive program that pairs top-ranked international students with specific research expertise with faculty at Canadian academic institutions for a twelve (12) week research project of mutual interest between May and October 2022. You have been selected by your Canadian host faculty project leader due to your background and skills in the research area and the unique contribution you will be making to the research during your stay. The skills required for your role (as described in the research description below) were found to clearly match your skills set, education, and research experience.

Research internship details

Research description:

University/Institution: Dalhousie University – Halifax

Host professor: RITA ORJI

Research project title: Preventive Pharmacovigilance: Home-Based Patients Monitoring App

NOC code: 4012 Post-secondary teaching and research assistants

Adverse drug reaction (ADR) is an important public health problem associated with a considerable amount of morbidity and mortality. Studies have shown that 5-10% of all hospital admissions are attributed to ADR. In Europe, about 197,000 persons die annually from the ADR-related problem. ADRs are the fourth to sixth largest cause of death in the United States. Despite being a leading cause of death, ADRs are largely preventable. The current pharmacovigilance practice rely mainly on spontaneous reporting systems and pharmacoepdemiological studies for detection and reporting of ADRs. However, these monitoring strategies do not capture all the ADR events occurring both in the hospital setting and in the general population. Therefore, additional strategies are needed to improve the monitoring and reporting of ADRs. Underreporting of ADRs is a major challenge for global pharmacovigilance and has a huge impact on the safety of medicines in public health. Although modern techniques are been developed including a web-based system, the existing monitoring strategies are inadequate and need to be integrated with fast-growing technologies.

In this project, we will design and develop a home-based monitoring of potential Adverse Drug Reactions (ADRs) using interactive mobile applications or/and web application. Using this app, both patients and their caregivers (doctors, nurses, etc.) will monitor the patient's responses to new medications. Patients will be able to track and record their reactions to various medications, observed changes. On the other hand, doctors and nurses can analyze these patients tracked data to predict possible adverse reactions to medications and take appropriate actions to prevent further damages.

During your internship, you will:

The student will join a team of faculty, postdoctoral researchers and graduate students working on various projects at the Human-Computer Interaction Lab. The student would work with graduate students on projects that involve developing and evaluating interactive systems. There is flexibility for the students to focus on a particular application; web application, mobile application, social computing, games, or some combinations. The student would have access to collections of computer science papers and other relevant literature and resources (software and hardware) needed for the project. We hope to publish at least a fully refereed paper at the end of the project and with additional work to be carried out remotely after the end of the Globalink visit we could possibly generate more publications.

Duration of research:

12 weeks — to begin between May 1 and July 31, 2022 (unless otherwise approved by Mitacs) and end no later than October 31, 2022 (unless otherwise approved by Mitacs). Shortened durations must be agreed upon with the host professor and Mitacs. Durations of

more than twelve (12) weeks will not be permitted.

Hours of work: Minimum of forty (40) hours per week.

Your award covers the full twelve (12) week of your internship unless you fall short of the full twelve (12) weeks, in which case the award will be prorated according to time actually spent in Canada contributing to the internship project.

Due to COVID-19, you will need to follow all travel and public health requirements as mandated by the Public Health Agency of Canada, your host province, and your host institution in Canada. The following requirements are subject to change at any time; please ensure you keep yourself updated regularly: https://travel.gc.ca/travel-covid/travel-restrictions/covid-vaccinated-travellers-entering-canada#entry-vaccinated.

As an intern, pursuant to Canada's *Immigrant and Refugee Protection Regulations s2*, you are entering Canada to undertake activities classified as "work". As such, you might be exempt from a work permit under the <u>Global Skills Strategy</u>. If you are required to obtain a work permit, due to COVID-19, immigration processing times might be longer than usual. You will be supported by Mitacs to plan accordingly.

By accepting this internship and agreeing to this Award Letter, you will follow all clauses as laid out in *Appendix A: Terms and Conditions — Obligations of the Globalink research intern.*

Upon arrival at the Port of Entry, you should have supporting documents, including (but not limited to):

- · a copy of this Award Letter in its entirety
- your valid passport and any other document required to enter Canada (see https://www.canada.ca/en/immigration-refugees-citizenship/services/visit-canada/entry-requirements-country.html)
- · proof that you meet requirements of the job, such as proof of work experience and education
- · necessary immigration documentation (i.e. letter of introduction, biometrics, visa if applicable)
- documents as required by the Government of Canada to demonstrate you are adhering to public health protocol, e.g.,
 pre-entry test results, ArriveCAN receipt, proof of vaccination, quarantine plan, etc. Please be sure to check the
 Government of Canada website regularly as requirements may change at any time: https://travel.gc.ca/travel-covid/travel-restrictions/covid-vaccinated-travellers-entering-canada#entry-vaccinated.

We look forward to welcoming you as a temporary member of the research team at Dalhousie University – Halifax.

Mitacs Globalink gratefully acknowledges the financial support of the Government of Nova Scotia, the Government of Canada as well as our partner in India, All India Council for Technical Education (AICTE).

Mitacs Globalink is delivered by Mitacs on behalf of the following Academic partners:

Acadia University Ontario Tech University Université du Québec en Outaouais

Algoma University Polytechnique Montréal Université Laval Athabasca University Queen's University University of Alberta

Brandon University Royal Military College of Canada University of British Columbia

Royal Roads University University of Calgary **Brock University** Cape Breton University Ryerson University University of Guelph **Carleton University** Saint Mary's University University of Lethbridge Concordia University Saint Paul University University of Manitoba Concordia University of Edmonton Simon Fraser University University of New Brunswick

Dalhousie University St. Francis Xavier University University of Northern British Columbia

École de Technologie Supérieure St. Thomas University University of Ottawa

Emily Carr University of Art + Design **Trinity Western University** University of Prince Edward Island

HFC Montréal **Thompson Rivers University** University of Regina

Trent University University of Saskatchewan University of the Fraser Valley Lakehead University **Trinity Western University** Laurentian University Université Bishop University of Toronto

MacEwan University Université de Moncton University of Victoria McGill University Université de Montréal University of Waterloo University of Windsor Université de Sherbrooke McMaster University Université du Québec à Chicoutimi Memorial University of Newfoundland University of Winnipeg

Mount Allison University Université du Québec à Montréal Vancouver Island University **Mount Royal University** Université du Québec à Rimouski Western University Mount Saint Vincent University Université du Québec à Trois-Rivière Wilfrid Laurier University

Sincerely, Ma

INRS

Petra Kukacka

Director, Program Operations

Enclosure:

Appendix A: Terms and Conditions

Appendix A: Terms and Conditions

Please note that your funding is provided in accordance with the All India Council for Technical Education (AICTE).

Obligations of Mitacs

a) Financial arrangements

Mitacs will be responsible for providing the following:

- 1. An airfare stipend of Can\$1,500;
- 2. A stipend of Can\$175 to contribute to the cost of transportation from the Canadian airport to accommodation, unless otherwise arranged by your host institution
- 3. A living stipend of Can\$200 per week
- 4. Ensure that you receive Canadian medical insurance
- 5. A daily allowance of Can\$45 for housing, for the duration of your research internship
- 6. A stipend of Can\$300 for any student fees charged to you by your Canadian host institution (the intern must pay the student fees to the institution directly; student fees above Can\$300 are the responsibility of the intern)
- 7. Reimbursement of immigration permit application fees (as required to participate in the research internship up to a maximum of Can\$240)
- 8. A stipend of Can\$500 for any COVID-19-related expenses (e.g., COVID test, quarantine, expenses incurred during isolation, etc.)

Under Mitacs's funding policy, we are unable to provide you with any funds in advance of your internship start date and arrival in Canada. In order to receive funding, all interns must possess a valid immigration permit for the duration of their internship. Interns will be responsible for opening a Canadian bank account, following Mitacs's instructions, in order to receive funds once in Canada.

b) Local arrangements

You are responsible for finding and acquiring your accommodations for the duration of your stay, but Mitacs will provide support for your search should you require it.

Mitacs will assume responsibility for the following aspects of your local arrangements:

- 1. Provision of medical insurance to cover you for the duration of your research internship, either through participation in a mandatory healthcare insurance policy offered by your host institution, or an equivalent policy purchased by Mitacs on your behalf;
- 2. Professional skills workshops and/or industry and/or government meetings to enhance the experience of your research internship;
- 3. Provision of a Mitacs-approved Globalink Mentor for you to consult with about issues and questions that arise during your stay in Canada and act as your emergency contact. (Please note that the University of Alberta provides their own mentors.)
- 4. Other activities at the sole discretion of Mitacs.

Obligations of the Globalink research intern

- 1. As COVID-19 continues to impose public health concerns and travel restrictions, this award is contingent on the permission of Canadian governments, the host institution, as well as the government of your home country for free movement of interns across borders for research purposes. Should travel restrictions impede your ability to travel safely to Canada, Mitacs will seek to provide a comparable internship experience through distance research. However, award amounts would be adjusted to reflect limited travel. In circumstances where travel is not possible and where virtual/distance interactions cannot be arranged to support your project, this Award Letter will be terminated and you will be reimbursed any eligible costs provided you have followed Mitacs's instructions in preparation for your internship and that such costs have not been incurred against the advice of Mitacs.
- 2. Upon your arrival in Canada and throughout your stay, you are required to follow all public health protocols and guidelines of the federal government, the province in which you are hosted and the Canadian institution at which you are performing research. You must also comply with all instructions provided by Mitacs including, but not limited to, arrangement of flights and housing, arrangement of immigration documentation, dates of travel, etc. Mitacs will not cover any costs incurred where the intern has not complied with instructions delivered through Mitacs.
- 3. Please be advised that, for immigration purposes, Mitacs is not your representative and cannot provide advice on immigration matters. Mitacs will provide you with information as available on public government websites to potentially help navigate through the process on immigration, but Mitacs cannot guarantee nor make any representation regarding positive immigration outcomes.
- 4. Interns are required to participate in the program for 12 weeks, working a total of 40 hours per week for their host professor on their research project, unless otherwise arranged with the Canadian faculty member and approved by Mitacs. If your internship length needs to be shortened, contact Mitacs at helpdesk@mitacs.ca.
- 5. As a key component of the Globalink program, Mitacs may offer program participants opportunities to engage in professional skills courses, industry and government relations meetings, and other networking opportunities to supplement your research experience. Mitacs will, whenever possible, schedule meetings and courses in such a way as to minimize the impact on your primary focus, that of contributing to the research project. You are encouraged to participate in such Mitacs-arranged meetings and courses, and your host professor will be asked to support this component of the Globalink program. You are normally expected to dedicate 40 hours per week on your research project and will need to make arrangements with your host professor regarding time away from your research project.
- 6. Interns are expected to complete a final survey administered by Mitacs to rate their experience of the program.
- 7. Interns are required to check with their home institution regarding any conditions or actions involved with participating in the program.
